

FORKLIFT FATALITIES

Nov 2010: A 25 year old worker was crushed when unloading a zoom boom.

Dec 2011: A worker was caught between two moving parts of a fork lift

Oct 2012: A worker was pinned between a forklift and a building while filling up the forklift.

October 2013: While on the tag line (rope) helping to stabilize the load of pipe being carried by the zoom boom, a worker was run over by the zoom boom.

April 2014: A worker was crushed while unloading a trailer with a forklift.

September 2014: A worker was walking alongside a loaded forklift when the load became unstable and landed on the worker.

November 2015: A 10 year old child lost control of a forklift on a gravel road, it went into a ditch and then rolled, crushing him.

January 2017: A truck driver was beside his flat deck trailer while a forklift was off loading it. Jostling of the trailer caused a top lift of lumber to fall from the truck and land on the driver.

September 2017: A worker was hit by a forklift while it was moving a load of granite stone.
